SEO + i18n + UX

Korean/Chinese/EN

This mockup keeps your existing section order and tone, but upgrades hierarchy, copy and conversion.

Let's build something amazing together!

Keep the 3-card section, but make each card outcome-focused.

Use a clean website UI mockup
Recommended visual

Multilingual Web Development

Build responsive, SEO-friendly websites in Chinese, Korean and English. Focus on launch speed, clarity and trust.

Section top: 96px

Use dashboard / analytics visual
Recommended visual

Maintenance & Optimization

Keep your site fast and reliable with performance tuning, accessibility fixes and ongoing updates.

Card gap: 24px

Use editorial / localization visual
Recommended visual

Content & Localization

Improve conversion with culturally relevant copy, accurate language adaptation and market-ready UX.

Card radius: 20px

What can you build?

Keep this section, but rewrite it as realistic client needs instead of generic categories.

For startups

- Global landing pages
- Product marketing sites
- Bilingual brand sites

For content businesses

- Localized blogs
- Course pages
- Membership landing flows

For market entry

- Korean market pages
- Chinese content localization
- SEO-ready expansion pages

Featured Projects

This is the most important section to add. It turns the page from portfolio-like into client-ready.

Use an actual site screenshot
UI screenshot or realistic mockup

SaaS Platform Localization

Recommended metric

View case study

for Korean, Chinese and English users

- Improve clarity of pricing, features and onboarding copy
- Highlight one measurable result or testimonial here

Project image height: 170px

Use a realistic device mockup
UI screenshot or realistic mockup

E-commerce Market Entry Page

Recommended metric

View case study

to match local expectations and language flow

- Create campaign-ready landing page sections for conversion
- Show before/after or product card improvements

Card gap: 36px

Metric pill under title

Insights on multilingual web & global UX

Keep the blog section, but make it work as proof of expertise.

Use calm 3D or editorial image
